

Exporting to the USA with the Electronic Manifest

UPS Supply Chain SolutionsSM

Under the U.S. Customs and Border Protection's (CBP) Automated Commercial Environment (ACE) program, how do you ensure seamless cross-border shipping?

Fast.

Accessible via www.ups-scs.ca, our Electronic Manifest is simple and easy to use, providing an effective means to create and submit compliant documentation. This program helps ensure that accurate details about your shipments are submitted in prescribed time periods and formats, enabling CBP officers to pre-screen your shipments, and allows for a streamlined process at the border.

Controllable.

Our Electronic Manifest also allows for a user-friendly and controllable interface to the U.S. Customs and Border Protection's ACE Trucking System. Carriers can personalize the way they submit bill and trip information; modify them at all times prior to submission to ACE; and maintain a database of shipment information for future access.

Secure.

UPS Supply Chain Solutions provides a solid and reliable solution to meet advance truck e-manifest requirements. With our Electronic Manifest, carriers are offered a personalized login and password for secure manifest data entry and transmission to the CBP.

Ensure Effective Business Processes

For a competitive rate, you will benefit from a complete e-manifest solution that will help you meet the electronic filing requirements of the CBP; thereby potentially avoiding heavy monetary penalties and/or delays in your cargo crossing the border. Make sure to use a program that has the technology support, monetary backing and intelligence to get your shipments moving effectively and on time.

Call us to set up an account today! It's quick and easy!
